

CGR-351 looks lonesome in slip awaiting decommissioning.

Half of crew shown in group and at work. Other half of crew already assigned to other units. (left)

The Old Workhorse of the Fire Division is the rugged CGR-351. Since she first went in service she has been hard at work every day hauling salvage; towing booms, logs; picking up driftwood; yanking small boats off the flats of West Basin and pumping water out of many a sinking hull. These among other things that mean more hard work. Berthed at berth No. 148 for most of her stay in the service, she is now being decommissioned, her crew assigned to duty at berth No. 198 with the SCANDIA.
