

## How They Offloaded at Kainan Bay:

MERHELL UNCOVERS THE HATCHES AND BOOSTS ITS CARGO UP AND OVER THE SHAVED-OFF ICE BARRIER.

OFFLOADING at the barrier posed special problems as these views show. In addition to heavy equipment there

was a refueling job on a 100,000-gallon avgas tank at LA-V speeded by a high-capacity pumping engine (right).

USS MICHHELL gives out with a crated partially assembled ORT (below) as AUKA nudges aside interlocking berg from the vulnerable cargo ship.
