

USCGC EAGLE (WIX 327)
PLAN OF THE DAY, MONDAY - 31 JULY 1972

REMARKS

1. It was necessary to go on water hours without prior notice due to the excessive amount consumed (7,800 gals. in a period of 1 1/2 hrs.). Water hours will remain in effect until the soundings indicate we are below the critical amount. In the meantime everyone must realize when at sea the following rules apply:

1. No hotel showers.
2. Take salt water showers (if available), followed by fresh water rinse.
3. Take sea showers.
4. Conserve water to the maximum extent.
