

**30 September 1987, Position: 9-16.12N, 79-55.24W.** With Panamanian lock workers clamoring for **EAGLE** ball caps, **EAGLE** is passing through the historic Gatun Locks on the Caribbean side of the Panama Canal. The rest of the day will be spent transiting picturesque Gatun Lake and the Gaillard Cut to moor at Rodman Naval Station. In the morning **EAGLE** should be rocked by gentle swells of the Pacific Ocean for the first time in almost 10 years.
