

STILL MORE OF THE SECOND PLATOON

Lawrence E. Mezza -- Larry is the much pitied roommate of the surfer. He attended Marietta College and received his B. A. in Biology. He hopes to fly like the birds and his first stop will be at Pensacola.

James S. Moore -- Steve attended Northwestern University and majored in Bio-Chemistry. He is generally interested in sports, graduation from OCS and women. Steve had the honor of being selected as our second Platoon Commander. He's requested assignment in the 12th District Law Enforcement Branch.

Michael C. O'Connor -- Mike is another of these surfers from California. He graduated from Los Angeles State and played on the varsity basketball team there. He's requested duty on a buoy tender on the West Coast. Mike will be remembered by the Second Platoon for his days as Platoon Guide - and of the unique movements he went through while guiding the Platoon.

Raymond J. Pratte -- "Pratte made a 95 in Navigation today" echoed the company! Aside from his main hobby, Navigation, Ray likes golf and photography. Being an old veteran of the Guard (12 years as a Yeoman and Journalist), Ray is the youngest old man in the company.

Ronald R. Reaume -- Ron attended San Diego State College and majored in Economics. Aside from being one of our Platoon Guides, Ron is interested in sailing, water skiing, skin diving, graduation from OCS and women. Ron has applied for flight training after graduation.

Max Schling, III -- Max III (you mean there are two more?) is the valiant Platoon Petty Officer for the third month. With a degree in Psychology from Rensselaer Polytechnic Institute, Max has been analyzing the OCS program. (His findings will be published at a later date). His duty station assignment requested is "Terra Firma". (Wherever that is?)

Donald L. Sherman -- Here is a true leader. (Of what, we don't know). Sherm is a graduate of the University of California and was a member of the Honor Platoon. This sunshine kid from California has requested assignment in Headquarters. The one thing that will remain in our memories is his proficiency in calling cadence.
