

3 JAN 80

GLACIER nested in the Ross Sea with the USCGC NORTHWIND (WAGB-282) and the Coast Guard's newest icebreaker, USCGC POLAR SEA (WAGB-11). This historic event marked the end of DEEP FREEZE '80 for NORTHWIND. During the nesting her helicopter detachment was transferred to POLAR SEA while GLACIER received 10,500 gallons of NORTHWIND's JP-5 aviation fuel.
