

Supply, a small department with a big job. Supply consists of the Storekeeper, Subsistence Specialists, and Corpsman rates. Totaling in all 22 qualified individuals.

This year GLACIER underwent an extensive yard period in which the Storekeepers were responsible for ordering, stocking and distributing the tremendous amounts of materials and parts needed to equip her for "DEEP FREEZE 81!" Adding to this unequaled responsibility was a first time handling of pay records for the crew of 220, normally a district responsibility. Keep your head above that paper work boys.

Subsistence Specialist, a rare breed, preparing daily substance for the crew of GLACIER under circumstances that would make even a veteran Coast Guard cook cringe. With a completely rebuilt galley and an almost total change-over of personnel, this department was left to work out all the bugs, with remarkable success. The daily meals were above average, not to mention the excellent holiday meals, and hearty cook-outs that took special planning and preparation. Our compliments to the chefs!

Corpsman, the men of the cloth, gauze that is. This small department must have set some sort of record by patching up almost every wound imaginable to human kind aboard GLACIER. These 24 hour commandos were assisted by 2 Naval Dental Technicians who did a super job keeping the old "Pearly Whites" intact. In sickbay the miracles never cease.

Supply Department, BRAVO! A job well done.
