

# ENGINEERING OFFICERS

"To the men and women below that make her go!" The GLACIER had a group of dedicated men and women who comprised the Coast Guard's largest Engineering Department afloat. These men and women worked endless hours overseeing the maintenance and operations of the largest diesel electric plant in the fleet. The long Yard Availability, HOPTRA and through-out the deployment GLACIER'S Engineering Department met every challenge. The many engine overhauls, fueling details, damage control training, small boat maintenance, science equipment upkeep and countless shipboard evolutions were carried out with professionalism and dedication. The Engineers can be proud of their accomplishments.

LCDR D. W. Gault,  
Engineering Officer
