

Commander  
C. D. Lancaster  
Executive Officer

"Deep Freeze '92 was a great success thanks to the hard work and dedication of the entire crew. This book reminds us of the good times and some forgettable times, too. Best of Luck to all hands."

Lieutenant  
Commander  
J. D. Chambers  
Engineering Officer

"The success of Deep Freeze '92 is a tribute to the character and abilities of the crew. From our accelerated cruise preparations when first tasked in September until completion of the channel breakin in January, it was one challenge after another in Engineering: main engine snubber valves, turbine controls, High Frequency Data Link, CPP pumps, the port shaft seal, the emergency generator and #1 fire pump. Then the logistics and science challenges began. Through it all, the crew remained positive, flexible and resilient. Thanks to you, we met each challenge and persevered, making this one of the most successful South trips ever. Well done!"

*J. D. Chambers*
