

Polar Sea Dive Team

Deck, Engineering, Operations, Supply

On AOS 1994, the Polar Sea Dive Team dove in support of science and ship operations. Hull inspections were conducted on both LOUIS S. ST-LAURENT and POLAR SEA. Light meter readings and under-ice video were taken as well as algae, marine life, and water samples for the embarked science party.

Over 30 dives were conducted in the ice, including a dive at the geographic North Pole.
