Diversified Jobs Keep Ops. Busy

Operations Department does everything from navigation to upkeep of electronic equipment to personnel administration. During the FleetEx Ops personnel were extremely busy with formation steaming exercises, signaling drills, teletype repairs, and management of monumental amounts of message traffic.

After the FleetEx Ops remained busy making boardings of the foreign fishing fleet.

Administrative matters never end, but the addition of the IBM PC computer in the ship's office helped YNC Burt keep up with the work load.
