## CPO Mess

There was no big disagreement in the Chiefs' Mess this patrol about milk machines or anything else. There was a loss of a number of people at midpatrol break for various reasons. Chief McBee, of course, managed to get another school for half the patrol, leaving AC&R concerns to MK1 Davenport.

After the FleetEx there was more time for everyone to spend in the Mess. It was at this

time that Chief Raisch's laser disc became quite popular. Lights could be seen on late at night for the poker players and movie watchers.

Because of the requirement that a Chief go on each boarding most of the Chief's had an opportunity to experience operations first hand.

It was the last patrol for a number of people; BMC La Forge, GMC Spain, SSC Hernandez, RDC Wilbert, and MKC Grayson. DCC Hernandez should have made his last patrol a while ago, but he has decided to stay for a fourth year!
