

of OMEGA receiver. The antenna was shipped to Nome, Alaska and installed 4 days later. It should be noted that Base Tak has a Loran-C signal simulator if work on the receiver is found necessary in the future.

3 The AN/SRN-12 OMEGA receiver was operational but not used due to insufficient stations on the air.

(d) RACON removal went smoothly with the exception that only one of three shipping crates reached the STATEN ISLAND. Plywood is very hard to come-by in Alaska and better care should be taken in the future.
