

ELECTRONICS TECHNICIANS

There are some five hundred pieces of highly technical electronic equipment on board Wachusett, each of which requires periodic cleaning and preventive maintenance. During our deployment one of our ET's was assigned as the Duty ET and was on call twenty-four hours each day to repair any casualty in the electronic equipment.

Under the direction of Chief Radio Electrician Thomas Hart, far left, the ET's are: ETN2 Terry Jarvis, TT3 Clark Jones, ETN3 George Lord, ET3 Timothy Martin, and ETCM Charles Anderson.

At right, ET2 Robert Daugherty checks a resistor against a schematic while, below, the ET's team up on a receiver.
