

BOILER TENDERS

The BT's do exactly as their name describes, they tend the boilers. The boilers make steam to power the turbines. The turbines turn the generators which make electricity for the main motor. The motor then turns the shaft and propeller. The boilers, and their tenders, are the foundation for all of Wachusett's locomotive machinery.

The BT's are, standing: BTC Edward L. Maxwell, FA Gary Linder, BT1 Olin Phillips, BT1 Larry Stapplemoor, and BT2 Roy Rudebaugh. Kneeling: FA William Hill, BT3 Dennis Pope, FA John Turpen, and BT3 James Ashe.
